General Comment

We cannot allow big tech to steal the work of hardworking Americans and make money on the backs of those actually putting in the work. AI should not be trained or built upon the work of anyone else without explicit consent and permission and a way for these big tech companies to compensate the true workers for their hard work and effort. Just because something has been posted to the internet does not automatically release the license or copyright of that work to the public, this is how it works for everything and everyone and we all must adhere to these laws. The original creator still has rights and ownership of that work. If we give AI companies special permission to evade the law without repercussion, then we are taking away the rights of hardworking Americans.
