General Comment

I do not believe AI holds a place in the future of the US, and it can even be a risk to national security and the legal system.

- * AI steals from the livelihoods of thousands, if not millions of American Artists
- * AI is overhyped, and will never approach the quality of actual human artists.
- * It floods search engines with fake images to the point where people struggle to find actual photos
- * It creates inaccurate data that can and has fooled people even in courtroom cases.
