General Comment

AI is an overhyped technology, specifically one hyped intentionally to create a speculative bubble. It is a wasteful and purposeless technology that is fleecing the investor class and stealing from everyone who uses the internet in any form. It is a technology designed for wide-scale industrial and intellectual theft, breaches of NDAs, breaches of privacy, and copyright infringement.

It has no future in the United States or elsewhere, as those who invest the most in it will also be its suckers, the victims of a bigger fools scam, when the rug is pulled out from under them. This technology has no long-term benefits for humanity, technology, science, or culture. It is a poisonous vacuum, a black hole into which many people seem content to toss very large sums of money on the back of irrational promises for which there is simply no material evidence.

It is a waste of time & money. It is, essentially, a scam perpetrated by a few Silicon Valley elites, which has heretofore successfully taken in countless gullible rubes whose fear of missing out has led to catastrophic damage—financial, legal, and otherwise.
