General Comment

AI is detrimental to artists, to consumers, to the spirit of human creativity and innovation itself and it is critical that it be strictly regulated, and scrutinized through the lens of ethics FAR more closely than it has been. It makes absolutely no sense to make AI an exception to copyright law, there is no moral reason to do this. If precedent is not set to protect human artists and to keep AI beholden to intellectual property law, the detrimental effect on society at all levels will be huge.
