General Comment

I am against allowing OpenAI and AI Companies as a whole to take copyrighted material for the sake of training their systems. I think the blatant theft of artist's work for the sake of what is ultimately a gimmick is appalling.

It is frankly ridiculous that this is even being entertained. If these companies wish to train their systems they absolutely must go through the same channels as anybody else to have access to it PROPERLY. All OpenAI has proven that if they can't have free reign to take whatever they want, they can no longer function as a company. What business structure is sustainable that they need to steal in order to survive? That is just a failure of a business.

Please reconsider allowing OpenAI and other AI companies access to copyrighted freely as this will have very real and lasting repercussions on not just creativity of the American people but of our country itself. I can't genuinely think anybody would ever allow work with our country if we allow companies to steal their IPs to feed what is essentially a gimmick that can be abused maliciously.
