General Comment

Generative AI data scraping is NOT FAIR USE and should not be allowed. Otherwise copyright will lose all meaning. Once AI has free-reign to continue to take and take, the counts of non-AI instances of individuals doing the same will ALSO rise.

If it continues long enough, Copyright will completely fall apart. How does one justify a Copyright Infringement when Generative AI can just 'learn' from and 'reproduce' from Copyrighted works without infringing?

Further, if AI voice-acting, AI singing, AI writing advance without guardrails or safeguards, how can one ever tell they're talking to the real person? Hearing the real person? It would be far, far too easy to just program an AI to impersonate someone and make them do or say whatever a bad actor may want.

What's to stop AI generation from stealing profit from corporations through false representation? False statements? Faked products? Already the AI generation problem is lowering the quality of all goods, including AMERICAN goods.

What's to stop a Foreign Actor from making an AI version of an American leader and making them say or do something to interfere with their image? Fabricate evidence, tamper with witnesses, etc. We as people, corporations and government are already struggling with such things as-is.

AI needs to be chained and collared. AI needs safeguards. AI needs to be CONTROLLED before WE lose control of the AI and suffer the consequences.

AI data scraping is copyright infringement. AI data scraping is not fair use. AI art is not art, AI voice-acting is not voice acting, AI products, AI movies, AI games are all scams. This will ruin our economy, destroy faith in government, corporations, religions, the American way will vanish. Collar AI. Control AI. Do not let AI destroy America.
