General Comment

It is absolutely critical that AI Companies must give notice, get permission from, and/or pay fees to copyright holders when their work is used to train AI. If this fails, then the copyright holders do not get credit or compensation from their work, which is protected by copyright. AI Companies should not have the right or ability to do their work unethically. And if they cannot do this ethically, they should not do the work, and they should not get funding for it. AI Companies must be held to the highest ethical standards.
