General Comment

AI should NOT be allowed unfettered access to user data without consent. All media types and forms should be protected from AI scraping unless given direct authorization from every individual involved. Users who are unable to consent (internet profiles of the deceased, users who are underage, users who no longer have access to accounts, users whose information is present on inactive webpages or forums, etc.) should automatically be considered and non-consenting. People are the priority, not machines.
