General Comment

I firmly oppose the AI action plan!

1) Generative AI is not a boon to national security – it is a direct threat to it! It makes creating deepfakes incredibly easy, hypercharging the proliferation of fake news! I thought this administration wanted to squash fake news – not promote it. Giving AI companies free access to Americans' personal data will destroy privacy and put everyone in this country at immense risk of exploitation.

2) This would be a direct violation of Americans' right to their own intellectual property; there is no valid argument for handing private corporations their creative works and personal data without permission or compensation – ESPECIALLY IF THOSE COMPANIES WILL CLAIM COPYRIGHT OVER AND MAKE US PAY FOR THE PRODUCTS THEY "CREATE" USING THOSE WORKS AND DATA!

3) This administration is supposed to serve the American people; not corporations who seek to exploit us for profit without giving anything in return. AI companies should not be allowed to reap the benefits of my hard work for free. I thought this administration was against freeloading!

Signing this executive order would be a direct betrayal of the American people, including those who voted this administration into office.

This document is approved for public dissemination.
