General Comment

I believe that generative AI is a grave threat to art and human creativity. It enables someone to steal work that someone else worked on, perhaps for a very long time, and take that work and repackage it to represent it as their own. It is a high-tech plagiarism machine in essence. Creativity is not something that should be automated, and especially not automated in the way generative AI does it, which is nothing more or less than theft. Please do not give OpenAI, or any other company using AI, the ability to steal people's work and then be immune to all lawsuits against them for their thefts.
