General Comment

I do not believe AI holds a place in the future of the US. It is a bubble, and it will burst.

I have friends who are professional game designers (huzzah for Steve Jackson Games!) and my wife is a poet. AI profits off of stealing their work and replicating shoddy knock-off versions which lack the care, understanding of the reader's context and interactions, and craftsmanship my human loved ones put into their works.

AI is overhyped and is fleecing the American public, depriving our youth of learning experiences, and incentivizing laziness.
