As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-0ji4-d63o
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6684

Comment on FR Doc # 2025-02305

Submitter Information

Name: Brandon Ta

General Comment

The integration of AI into nearly every product and service has not yielded any appreciable gains to the general American public. AI is an expensive, often-flawed, narrow-use-case technology that must steal user and creative data to sustain growth and self-perpetuation. Generative AI is already been shown to de-skill students and professionals that rely on it, allowing their critical thinking skills to atrophy. Even Microsoft has scaled down their resource spend and outlook on AI technology. At-scale adoption of AI in American education, government, and business will cripple each of those sectors in the long run.
