General Comment

I'm going to be upfront. And if you end up enabling mass AI, then you'll make NDAs ridiculously difficult to enforce. You ever try to be in one?

I'm in a few.

Plus on top of many issues with security, if you start mining the pentagon for data, then you'll end up with a ton of issues. Please do not put this act into play.

Otherwise, this will heavily open up issues with security, revenge pornography, grotesque generations and use of libel in public security cases. You technically could not stop more grotesque pornography from applying to Sam Altman if you enable this into play.

I'll need someone to simply take a sandal, approach Sam Altman and smack him upside the head for me. I'm disabled and I need help yelling at that guy.

Thanks a bunch!
