General Comment

It's absolutely nonsensical that we should allow OpenAI to scrape the internet and use copyrighted works as part of its training data. As an author and content creator I do not consent to this. If generative AI companies say they can't have a business model without wholesale theft of creative works then tough luck. They don't have a business model. Simple as. I reject anything to do with OpenAI, Microsoft copilot, Google Gemini and any other gen AI tools wholesale.
