General Comment

Generative AI has no place in the future on the United States. It steals from creators, ruining the livelihoods of countless people who will never receive credit for their work that's regurgitated in poorer form through AI. This endeavor destroys the environment, while its users are ignorant of the consequences. AI feeds the public lies and harmfully false information, sometimes under the guise of facts from seemingly reputable sources. Generative AI is a disgrace that violates copyrights, actively harms creators, irreparably damages the environment and natural resources, and misleads the public with disastrous consequences. This trajectory MUST be stopped immediately not only for the preservation of the value of the arts, but also for the sake of the future for all Americans.
