General Comment

"AI" is plagiarism writ large.

"AI" is the theft of intellectual property.

"AI" is the misuse of natural resources, including the egregious misuse of water. Some data centers built to support AI activities are already sucking their municipalities dry.

Statements that all these things have to keep happening in order to keep innovating or something are just bonkers. I strongly oppose this policy.

(also is there really anyone left at NSF who's actually reading this, or do I need to wave at Elon and DOGE as I write this?)
