Address: United States,

General Comment

I am opposed to the creation of an AI action plan. An AI Action plan will open the floodgates to removing the livelihood of countless artists. If creators have no control or agency over their content they have no way of ensuring fair compensation for their work. Literally everything our modern social structures use relies on people being able to hold the creative license for their work. Tv, film, books, even content creators on youtube and other social media will be subject to having their content scraped and used to generate a stream of money for tech billionaires who have done nothing to earn it. AI as a tool exists and will grow to be so helpful in many situations, but only if it is given guardrails that respect privacy and intellectual property. Stop the AI action plan, invest in protections for artists and creators instead.
