General Comment

I do not believe AI holds a place in the future of the US.

AI steals from many people's livelihoods as an American and profits off of theft.

AI is overhyped and is fleecing the eyes of the American public.

AI should not be used for creative purposes. AI is something that should be used purely for scientific and medical purposes, not for creating music, art, or as actors.

AI is a technology that is a passing trend used as is, when it comes to creativity. Once the trend passes, the money that will be made from it will not recuperate the money spent, the resources spent, nor will it recover the relationships made with artists, musicians, and actors in the attempt to replace them with it.
