Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6740

Comment on FR Doc # 2025-02305

Submitter Information

Name: Destiny Pitts

General Comment

Do not allow Generative AI to train off of actual people without their consent, it will create an ecosystem that is vastly more unhealthy for those both creating and consuming content. It makes it harder for real people to make a living in already harsh times, and can likely be used to create more convincing scams to pull consumers into, funneling money into places that only serve to hinder us further.

As a creative myself, Generative AI has made my life notably more stressful on top of everything else. It's relatively unhindered spread into as many places as it has brought down the quality of gathering information and factual references to things harder, most of everything is getting filled with spam from all of these "tools".

It is going to swallow the internet whole if allowed to continue like this unchecked, rendering it near useless before cannibalizing itself. And I would deeply prefer not to see this happen in my lifetime, or the lifetimes of those after me.
