General Comment

Generative artificial intelligence has no place in America. It's wasteful, thought-terminating, and more often than not flat-out wrong. And if that weren't bad enough, it's designed from the ground up to profit from theft. Creative people should not have their hard work stolen and ground up into slop to feed these machines. Open AI and other companies should not get to profit off of that stolen work. There's nothing that a generative AI model can do that can't be done better, more efficiently, and more ethically by simply paying a human being to do the work.
