General Comment

OpenAI does not need the ability to legally steal information to feed into the AI. OpenAI should not be immune from copyright infringement. This is not a matter of national security. AI does not hold a place in the future of the United States; especially if its future is based on stealing creativity and work from human beings. AI is already stealing the livelihood from Americans. It profits from theft. AI needs more regulation, not less regulation and it certainly does not need to steal copyrighted content to use for training.
