Address:

General Comment

Hi, I am a writer working in the creative arts. Copyright is the backbone of America's creative industry, as it allows for companies to protect their investments in intellectual property, from books to film to tv to plays.

Copyright laws also protect artists from plagiarizers, people who want to steal popular ideas as a shortcut to getting rich themselves, without properly compensating the artists.

AI companies steal from copywritten work to try and replicate what hard working artists do. The reason America's creative industries are the rival of the world, is because creative people want to make things that resonate with audiences. If artists do not get properly compensated, then AI companies will kill these professions and American artists and industries will fall behind Europe and Asia.

We must protect the written word from getting stolen by AI companies. AI companies must properly compensate hard working American artists if they want to use our work.
