General Comment

I do not believe OpenAI, or rather generative AI as a whole, is a net positive for our nation, the uses AI has done has only stolen jobs from people in the creative community, used to make deep fakes of anyone to ruin their reputations, and is only overly hyped up by tech corporations as the future just to sell something that benefits nobody but themselves

For the sake of not only for the people of America, but for the people of the world, do NOT support the advancement of generative AI
