

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-0qzt-1lrk
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6831

Comment on FR Doc # 2025-02305

Submitter Information

Name: Kat White

Email: [REDACTED]

General Comment

Generative AI does not hold a place in the United State's future. It is an overhyped, dangerous blight built on theft that threatens not only the livelihoods of many Americans but leaves a devastatingly large environmental footprint. It is being pushed so forcefully because corporations are flailing to get a return on the fortunes they've sunk into an inherently predatory and problematic system.

It has even more ruinous potential if granted wholesale use of copyrighted works, particularly anything that might allow genAI platforms to create and perpetuate falsified photos, videos, etc. Beyond that, its capacity for the spread of misinformation is massive and studies are showing that it can "inhibit critical engagement with work and can potentially lead to long-term overreliance on the tool and diminished skill for independent problem-solving" (please see attached file).
