General Comment

AI should've been made to do boring menial tasks no human should have to do, and yet, AI is here doing all the things humans must do to be human- our art.

AI hurts every single American who wishes for a future. The environmental costs, along with the ethical ones, cannot be overlooked.

It is imperative our leadership realizes the direct harm that will be caused by allowing free rein to any AI corporation. Not just to regular Americans, but also to them in regards to how it has no barriers to not train off classified information. It is an intelligence nightmare to allow AI to be this close to government offices.
