General Comment

Any AI advancement should be beholden to copywrite law,data being indeterminately scraped without permission or payment form American citizens must be stopped. Private citizens have had their personal medical data added to these datasets. It's full of porn and sinister content from across the internet because no one has cared to vet it. No one is overseeing that AI has morals or codes of ethics, this technology is being pushed fast in an attempt to cash in and cash out at taxpayer's expense. AI has been around several years now, we have seen how in practice it hallucinates untrue answers constantly, we must be considerate of what we are actually creating and how many valuable resources like energy we are putting into haphazard technology. Especially now when we are on the verge of threats of energy being cut from Canada.
