General Comment

None of what OpenAI uses to train its models is obtained with the consent of their original owners, and their use in training cannot be defended by the fair use doctrine. It is unmistakably, definite theft, outright. Any implementation of laws protecting OpenAI and what they do would violate innumerable copyright laws listed in the U.S. Code. Artists worried for the compromising of their work — which is an overwhelming majority of them — deserve at least the assurance that their work will not be stolen. Protect artists.
