General Comment

Theft of copyrighted content by AI models is actively harming my ability to do work, and enjoy the creative pursuits which I've spent so much of my life dedicated to because the product of my work is under a much greater threat of theft than ever. If AI companies in the United States are unable to function without stealing from the work of honest, non-thieving Americans, then they do not deserve to exist. We are better than this; the exploitation of creative work by AI companies will only lead to the stagnation of the American arts and sciences, the death of industries, and lack of opportunity. Please--regulate and fetter the ability of AI companies to conduct this wholesale theft, restore sanity, and value the rights of American innovators and creators to enjoy the fruits of their labor. Don't give AI companies a free pass to steal from Americans.
