General Comment

I am very uneasy about this action plan. AI is typically trained on copyrighted material, without any compensation or attribution for the people whose material is being used. Given that this copyrighted material is then incorporated into the AI's output, this is tantamount to theft and/or plagiarism. As an academic librarian, I spend a great deal of time teaching students about citing sources and other aspects of proper attribution. The fact that AI uses the intellectual and artistic output of others without the kind of attribution or citation we would expect in even high school level student work is appalling. Please rethink this plan.
