General Comment

I do not believe generative AI will help humans flourish. Training AI on copyrighted materials is stealing and a gross violation of personhood. Regulation and laws must be enacted to restrict the private sector's ability to rob and siphon other individuals intellectual property. Art is an expression of humanity, and something as heartless and soulless as AI should never be allowed to infringe this country's culture. It is self-sabotage, immoral, and a mutilation of human heritage.
