General Comment

I am adamantly against the unlawful and illegal assistance proposed under the Executive Order. Artificial intelligence is no more the wave of the future than the segway. It is a gimmick to boost the stock of tech companies who can offer nothing more than so-called genAI-"created" content cobbled together from the work of actual human beings—writers, artists, actors, musicians, etc. Companies such as OpenAI and their leadership have stated that they cannot last unless given access to copyrighted materials. Good. If that's the case, then they should die. Creative people are owed their due and they are owed respect and dignity for their engagement in the act of creating—one of the most human instincts that we have. The cold inhuman machine learning calculated regurgitations of "AI" can and will never match that of humanity. Spend this money on anything else. Medicine. Education. Supporting the arts (the HUMAN arts).
