General Comment

I am most concerned about the open-ended nature of the following directive "This order revokes certain existing AI policies and directives that act as barriers to American AI innovation, clearing a path for the United States to act decisively to retain global leadership in artificial intelligence." Not only does it not define what it is attacking and what will be swept away, it also seems to suggest that the safeguards for intellectual property will be ignored. We the public are supposed to comment on vague hypotheticals "certain policies". The jettisoning laws in favor of dominance seems regrettable and probably a court case waiting to happen.
