

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-0vxo-f77w
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6939

Comment on FR Doc # 2025-02305

Submitter Information

Name: Michelle Gilmore

Email: [REDACTED]

General Comment

Setting any "creation" engine up to be free from legal recourse is a bad idea in general: from stolen copyright materials, to the inappropriate use of people's likeness and voices (from private citizens to politicians), to the blatant incorrect information that AI is known to present as fact (i.e. on search engines or chatgpt).

Generative AI is built off the backs of individuals who in most cases have not and do not wish to have their work used to train the engines. Not only is the work it produces of varying quality but it's also a rehash. There is no actual "creation" happening. Without outside 'influence' it just produces the same ideas. AI needs outside creatives, who work hard to create and use those creations to survive.

If AI is let loose, those creatives are directly hurt. Industries will shrine to those who are simply working off the bones of other things, while the majority who worked on those project will see other employment or suffer.

I opposed AI being free of legal consequence
