

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-0wfk-o5xi
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6955
Comment on FR Doc # 2025-02305

Submitter Information

Name: Andrew Prichard
Address:

General Comment

If a business is utilizing and handling AI to grow and expand their business from other resources other entities have produced, even if said AI falls under public domain, the business utilizing and handling the AI must be responsible in the compensation of utilizing said resources to their respectful parties. Reasons to use such resources may be as follows: to expand, improve, and/or utilize said AI to their respectful parties that the AI is using for reasons such as neural networking, data sets, etc.

Nothing is truly free. Someone worked before the current user or holder of a resource, such as media, medical research, economics analyses to make, or collect, or research to better society in either informational, such as the study of cancer, or entertainment, or more ways than those two listed items.

OpenAI needs to give compensation and reimbursement to the people, both individual and group-wise, where the private and the public and the government funded goals and projects are given their fair due of effort to add and improve society themselves.
