General Comment

Artificial Intelligence as promoted by OpenAI does not have any place in our lives. It is nothing more than a plagiarism machine that aims to steal information and data from people while simultaneously consuming resources that should be protected. It is essential that AI is not allowed to be immune to copyright law as it profits off of theft. I believe that the recent example of DeepSeek has demonstrated that no one in charge of "AI" has any idea what they are doing and are simply using this tool as a means to steal money, resources, and rights from every one else.
