

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-0ygs-kauj
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-6986

Comment on FR Doc # 2025-02305

Submitter Information

Name: Pablo Romero

Email: [REDACTED]

General Comment

AI usage art legitimizes and enables large-scale artistic theft because these models are literally built on collections of data that appropriate the work of professional artists without their consent, credit, or compensation. The AI companies trained their models on copyrighted works, scraping enormous caches of art under the spurious guise of "fair use," while being very clearly in contravention of intellectual property rights and ethical creative practice. These algorithms of AI do not produce the best way; they merely re-mix and regurgitate what has already been done, acting as high-end plagiarism devices that commodify borrowed art for corporate profits. By allowing such mass commercialization, governments are party to the undervaluing of artistic professions, disenfranchising artists of control over their own work while empowering a torrent of derivative, machine-generated content that undermines both creative integrity and the sustainability of the arts. If left unchecked, this technology exploitation will only continue to devalue human artistry, reducing it to grist for profit-driven algorithms that aim to enrich tech conglomerates at the expense of creators themselves.
