General Comment

I do not believe AI holds a place in the future of the US. AI steals from my livelihood as an American and profits off of theft. AI is overhyped and is fleecing the eyes of the American public. OpenAI's ChatGPT has not improved its abilities to summarize things in the past 2 years. AI is bad for the economy. It is destroying the long beloved human tradition of art itself. If this proposal is allowed to be implemented, companies are going to lose so much money from the resulting boycotts, which means their shareholders and executives will be hurt. Supporting AI does not truly support business interests or the free market economy.
