General Comment

Letting this happen opens up the issue of art being something that cannot be defended, and more importantly, that someone's idea and hard work means nothing.

More importantly for corporations (since that is all that matters in our politics), it means that unique ideas and licenses could, in the future, also not be able to be copyright protected. The idea of this is moving the goalpost further and further to defend copyright, and eventually, copyright won't mean anything anymore.
