Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-10a1-ba4t
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7025

Comment on FR Doc # 2025-02305

Submitter Information

Name: Abigail Sharp

General Comment

Hello and thank you for your time to consider all public comments regarding AI.

I am writing to implore you to reconsider utilizing any and all AI services/programs. I have spent the past two years watching friends and love ones suffer at the hands of this technology as their art is being used to feed these programs to churn out half-hearted images that their creator likes to call "art.". I have seen first-hand the inherent laziness that comes with utilizing this type of technology, from students in a university setting to my veterinary colleagues who cannot take two minutes to type up their client communications that are part of a legal document (medical record). Even with all of this, this technology is having a horrific impact on our environment. The amount of water that is needed to run these programs and to keep their servers running is astronomically high and in a time where the effects of climate change are being felt all across our wonderful nation, we cannot afford to let these programs run rampant.

Until we can better figure out how to program these technologies to come up with content and information without impingement on copyrights of the artists in our nation AND without impacting our environment, we should not be utilizing these technologies at all. This technology will not make anything more efficient and will steal the jobs of thousands of Americans. It would be large stain on our country as a whole and will impact everyone.

Thank you for your time.
