

PUBLIC SUBMISSION

As of: March 21, 2025
Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-10rj-9pwu
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7035

Comment on FR Doc # 2025-02305

Submitter Information

Name: Sohrab Rahmani

[REDACTED]

General Comment

A.I. in its current unregulated form has caused so much pain to our society and cannot be allowed to have any more access than it does already. Let me tell you something. I have a cousin who dropped out of school because the boys in her grade generated lewd A.I. photos of her. I cried when I found out about this. How careless and reckless A.I. has been brought out. How the tech industry just doesn't seem to care about what happens to people when they release these tools without regulations and restraint. It has stolen jobs in the healthcare field where people are now dying because they have been denied care. A.I. Needs to be reserved for the sciences and taken out of the standard consumer hands until it is properly regulated and artists , film makers, designers, are fully protected. Because A.I. currently just spews out an amalgamation of already created works. It Floods social media with Lies, Scams the Elderly with A.I. generative phone calls. Fools people in love into believing they have found someone special. A.I. is like nuclear energy. Without Serious world wide regulation it can and has harm the public with false information, deepfakes, etc. With that I leave you with a quote from a beloved movie by all that best explains the current situation.

"You stood on the shoulders of geniuses to come up with something as quick as you could. And before you know it, you, you patent it and package it, and slap it on a plastic lunch box, and now you're selling it, you're selling it!"

-Dr. Ian Malcolm (Jurassic park)
