Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7038

Comment on FR Doc # 2025-02305

Submitter Information

Name: Aaron Roth

General Comment

The use of Artificial intelligence shouldn't be pushed as this. We already have issues as people of AI companies breaking the law through theft of individual copyright holders on all scales. Every aspect of arts has been ripped through scraping of data to be used unlawfully and unwillingly. Pushing forward a law such a this will not only encourage more theft of the mass scale, but gives immunity to those companies who are stealing from people.

As well, the use of Generative AI has no place in the government, let alone public use. It's convincing enough to make others see fake videos seem real and can easily be used to falsify evidence. With other forms of AI being misused to point guilty at innocent people and be a security risk as companies will sell out secrets to the highest bidder. It's already been shown with Health Issuance companies using AI, a large amount of people getting denied helped and medical treatment they need because "The algorithm" doesn't want them to get it. Currently as we stand in 2025, there is no place for AI. Not in it's current state, not with the data it steals, not with it's current developers. and letting it in with the law will only make life worse for a lot of people.
