General Comment

AI is not the future of this country. It will only make things worse. It will open up endless means of exploitation of US citizens, no matter what their social stature is. If you are the average citizen, AI can and will be used to replace critical government services which people rely on every day, and/or scam you out of your hard earned savings in various new and awful ways. If you are a lawmaker or politician, your words can and will be used against you by bad actors with free access to AI.

Stop the madness. Keep the regulations in place.
