Docket: NSF_FRDOC_0001

Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479

Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7046

Comment on FR Doc # 2025-02305

Submitter Information

Name: Caitlin Trudell

Email: [REDACTED]

General Comment

AI is deeply harmful to many creative industries, and produces inaccurate, useless nonsense at it's current state of development. It benefits no one, besides a few techbro shareholders of AI companies, wastes massive amounts of energy, and has yet to be implemented in any meaningful way to productive workflows. I honestly don't think you care about what the average creative has to say about it, but major companies such as Disney and Sony who are notoriously protective of their IPs likely will not enjoy their protections being stripped and their content stolen to prop up a few failing AI companies. If the technology was any good, it wouldn't need to steal so much copyrighted content to produce results.
