Received: March 15, 2025
Status: [REDACTED]
Tracking No. m8b-1169-ur0b
Comments Due: March 15, 2025
Submission Type: API

Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7050
Comment on FR Doc # 2025-02305

Submitter Information

Name: Jonathan Collins

[REDACTED]

General Comment

This plan is an overstep. We have had these rules in place to protect creators of all kinds throughout the growth of the US. Allowing any AI to skirt those rules feels like a push in the wrong direction from the core values of the laws we have in place.

The use of proprietary images and data has been skirted for years in the coming of the internet age knowingly by perpetrators and plaintiffs alike. It has been embraced as a "Any publicity is good publicity."

Large corporations requesting access to data for free is beyond the scope of their AI projects knowing that smaller AI structures have accomplished far greater good with much limited scopes. This action plan as its called is a sham for a hype fest around a series of applications that have no directed purpose other than "Collecting Data."

As I use these products more and more in my time I am finding myself seeking out the data presented through other means to make sure what I'm being presented is correct. I find it appalling that the use of these products is coming at a cost of critical thinking.

This push is as useless as the technology associated with the plan. The Artificial Intelligence Action Plan should not proceed.
