General Comment

If we are not pursuing "Safe, Secure, and Trustworthy Development and Use of Artificial Intelligence" then we shouldn't be doing it at all. It is crucial that the development of AI be done in consultation with groups like <https://www.dair-institute.org/> and <https://www.humane-intelligence.org/> to ensure that it is used reliably and responsibly.

We also have to do what we can to minimize the climate impacts that the massive increase in energy consumption of AI is causing :

<https://theconversation.com/ai-is-bad-for-the-environment-and-the-problem-is-bigger-than-energy-consumption-247842>

<https://www.science.org/doi/10.1126/science.adt5536>

<https://scet.berkeley.edu/reducing-ais-climate-impact-everything-you-always-wanted-to-know-but-were-afraid-to-ask/>

If we don't address these issues as well, we will only be creating further disaster. Not to mention the ways in which AI models have benefited from stealing content from everyone online. Which also needs to be stopped.
