General Comment

This is an absolutely ridiculous proposition that's counter to everything that makes America America, to say nothing of the ethics of the situation. This is wrong, pathetic, disgusting, and anyone involved with it should be ashamed for pitching it.

Generative AI - Open AI, Dall-E, Midjourney - is a scam. It has been a scam and will continue to be a scam. It's being pushed hard by the same people who brought us cryptoscams and NFTs. It does not hold a place in the future of the United States of America and is overhyped and poorly understood by its users.

Further, as a writer - both professionally and as an avocation - generative AI steals from my livelihood. I hate Ayn Rand with from the bottom of my heart, but people pitching AI love her and her terrible book, "Atlas Shrugged." And if there has ever actually been anything in the United States that resembles the paranoid frenzy of "but these people are parasites!" at the core of that book, it's generative AI.

Absolute dullards incapable of creation and hungry to steal and monetize their ill-gotten gains demand to train their plagiarism engines on the work of actual laborers and creators. They're stealing from geniuses to sustain themselves.

Owners and pushers of generative AI are parasites. They're unAmerican. They're monsters. They care only about themselves and are pushing a flawed, garbage technology on the American people - who by and large despise it.

Do not allow this. It is legalized theft.
