General Comment

AI as it's currently being marketed and used is a plagiarism machine that still manages to constantly get very basic information wrong, requiring a human to come back and fix whatever it was doing, and at greater cost because now you've paid for the AI and a human! It is in no way worth investing in.

AI is a dead-end tech. It's all hype and no use, just like cryptocurrency and NFTs, which have both flopped spectacularly, leaving everyone involved looking like absolute buffoons. Is that what you want? For America to become the fool of the world?
