Docket: NSF_FRDOC_0001
Recently Posted NSF Rules and Notices.

Comment On: NSF_FRDOC_0001-3479
Request for Information: Development of an Artificial Intelligence Action Plan

Document: NSF_FRDOC_0001-DRAFT-7068
Comment on FR Doc # 2025-02305

Submitter Information

Name: Tabby Sabourin

General Comment

Hi.

Generative AI is a massive burden on the energy sector, which this administration has claimed to already be over-burdened (it isn't). So why, pray tell, would you add more energy centers, waste more water, and waste more fuel on something that will only flood the media with junk, slop, and garbage.

AI has incredible potential for uses in the medical field, in forensic science, for automating mass transportation, and so much more. Why focus on removing barriers for programs that are already churning out misinformation, deep fakes, and just... ugly, useless, soulless, and completely non-creative trash.

OpenAI, DeepSeek, Chat GPT, etc. are all built on work that has been stolen from real human beings who deserve to be paid fairly and have their work used correctly.

This is one of the dumbest things y'all have been pushing, and that's saying a lot.
