General Comment

I don't accept this action plan as written.

Copyright exists to preserve intellectual property and respect the efforts of humans who ideate, create, and build things meant to benefit or entertain other humans while ensuring the creator is properly compensated for their labor.

AI does not, by the strictest standards, labor in a way that is meaningful in this context. We don't allow people to get away with plagiarism; we should not permit AI to commit the same kind of intellectual theft in the name of 'training'. Training AI does not qualify as fair use, and the existence of AI unregulated as it is right now is actively harming the livelihood of countless Americans, with that number growing.

Do not permit AI unfettered access to copyrighted information without due transparency, consent, disclosure, and compensation to the rights holders.

America should not be advanced by way of gifting and theft. We must do this responsibly if it has to exist at all.
