General Comment

I am strongly against allowing corporations to access and use copyrighted works to train AI programs. Doing so plunders the hard work of thousands of artists and creatives, stealing their ideas in order to drive those same creatives out of the arts & entertainment market. It is ethically reprehensible and only serves to make it easier for corporations to churn out cheap low-value products which will be disastrous for the entertainment industry as well as freelance artists, and will decrease the available pool of jobs for creative workers.
